

MJ Freeway solutions for cannabis regulatory compliance.

**Comprehensive track and trace software** for regulators that supports a tightly controlled “chain of custody” model and helps prevent diversion and fraud. Includes data points for each element in the cannabis lifecycle, including: cultivation, harvest, processing, distribution, inventory, and sale.

Tracking continues even when product is transferred from one license type or business entity to another with patent pending seed-to-sale traceability, providing regulatory authorities with visibility into the operations of licensed cannabis businesses.

- Aggregated view of activity across the state with robust reporting
- Configurable alerts around any events in the cannabis lifecycle that fall outside of expected parameters
- Designed to help enforcement efforts be effective and efficient

## MJ Freeway solutions for cannabis regulatory compliance.

Leaf Data Systems allows all licensee-facing activities to be performed in batch or real time:

- Upload data through a secure API, CSV, or web-based interface
- Batch upload capability supports licensees without regular Internet access
- Separate test results API for laboratories

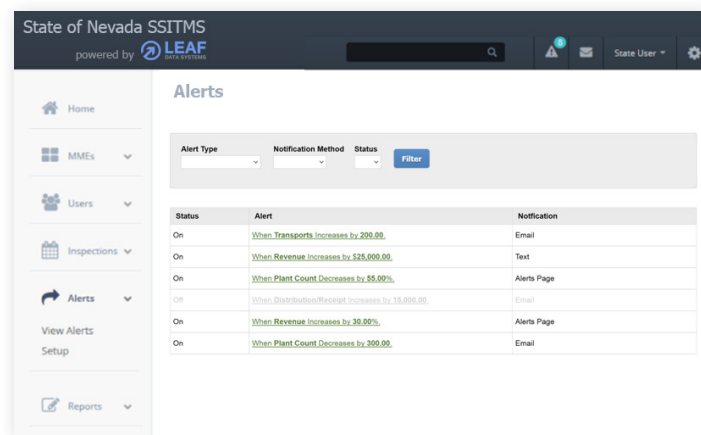

The system is customizable for unique regulatory requirements. Leaf Data Systems' COTS software includes configurable options for the many common requirements:

- Patient purchase limits
- Quarantines of product pending test results
- Infused product potency methodology for calculating the quantity of marijuana in an infusion
- Distribution and delivery tracking that captures and records both wholesale distributions and patient/consumer deliveries

**Training:** The experts at Leaf Data Systems offer extensive, customized training at implementation and ongoing, specialized for the regulatory environment.

**Reconciliation tools and error notifications:** Leaf Data Systems ensures that licensees have all the tools they need to meet compliance requirements.

**Localization:** Leaf Data Systems is available in English and Spanish currently.
