## BUILD SAFETY SOLUTIONS FOR STATE COMPLIANCE PROGRAMS

Safety through compliance starts at a program's foundation. States can build public, product and patient safety into their cannabis compliance program, from the ground up, through:

1. Compliance requirements that extend to capturing of all product details, such as complete ingredient lists including additives.
2. Integrating a comprehensive seed-to-sale platform that monitors all verticals and drives compliance.

## ABOUT LEAF DATA SYSTEMS

Leaf Data Systems provides government clients with a compliance technology solution with safety for cannabis programs built in. Using a closed-loop platform and advanced tagging technology, with Leaf Data Systems, government clients can not only track-and-trace products; they can have a deeper level of transparency and accountability.

Leaf Data Systems is deployed in Pennsylvania and Washington state. The next generation of Leaf Data launches in Utah in 2020.

**YOUR SOLUTION FOR STATEWIDE CANNABIS COMPLIANCE**  
**YOUR PARTNER IN SAFETY**

**We share your goals of creating a transparent, accountable, patient-centric and safe cannabis program for your constituents.**

## **LEAF DATA SYSTEMS DIFFERENTIATORS INCLUDE:**

### **FASTER TO IMPLEMENT**

Leaf Data Systems is the viable commercial-off-the-shelf solution for cannabis traceability, making implementation fast and easy.

### **DATA COLLECTION**

Leaf Data Systems can accommodate large variances in the data points governments request. With a few clicks, reporting can be easy. Data can be available within 15 minutes for real-time compliance reporting.

### **MORE TRANSPARENCY & ACCOUNTABILITY**

Leaf Data Systems closes the loop between governments and licensees, eliminating alternate data collection sources, reducing errors and improving security and accountability.

### **INTEGRATED TRACEABILITY**

Leaf Data Systems delivers state of the art tagging technology, solo\*TAG, a digital fingerprint that eliminates the need for expensive and ineffective technologies like holograms and RFID.

### **BRANDING FOR EXPORT MARKETS**

As a government traceability product, solo\*TAG has the unique ability to remain a secure digital fingerprint, while also authenticating a country's product in a highly customizable, branded graphic.

### **MOBILE APP**

Leaf Data Systems is now the first mobile-enabled, seed-to-sale government traceability platform for cannabis businesses and regulatory bodies.
